To decelerate masses in reciprocating, linear, circular and other movements.

As shock absorbers of weights in free fall.

For the suspension of vehicles and wagons.

For the tightening of chains, conveyor belts, rollers....

Range of energy absorption from 5,000 kp x m to 300,000 kp x m.

Deceleration stroke from 50 mm to 500 mm.

Impact head made in steel or polyurethane.
