

HIDRACAR S.A.

THE “IDEAL” BLADDER ACUMULATOR EL ACUMULADOR DE VEJIGA “IDEAL”

Our sealing system is guaranteed even at rubber limit temperatures.

Sistema de estanqueidad garantizado incluso a las temperaturas límite del caucho.

The dismantling of the rubber bladder allows for a proper diagnosis in case of bladder rupture.

La vejiga desmontable permite un diagnóstico certero en caso de rotura.

Our rubber bladders are 100% gas impermeable and are made in just one piece, without glued parts.

Vejiga de caucho 100% impermeable al gas, de una sola pieza y sin empalmes.

The honed inner surface of our dampeners prevents bladder rupture from friction.

Pared interior lapeada que elimina la rotura de la vejiga por rozamiento.

All bladders are fitted with a self-centering anti-extrusion button insert that prevents high stress from building up in the rubber.

Botón anti-extrusión autocentrador que evita la creación de tensiones límite en el caucho.
